EXAMINER

THOMPSON, ANNETTE M

ART UNIT PAPER NUMBER

2825

DATE MAILED: 06/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

09/896,059

**Applicant(s)**

BHATTACHARYA ET AL.

**Examiner**

A. M. Thompson

**Art Unit**

2825

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 February 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-77 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-77 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 February 2005 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

Applicants' amendment to 09/896,059 has been examined. Claims 1-77 are pending.

1. Further examination and reconsideration precludes allowance in view of the new grounds of rejection entered herein.

#### ***Drawings***

2. The drawings are objected to because at Figure 2, #'s 210d, 220 decision boxes requires yes/no labeling. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

3. Claim 73 is objected to because of the following informalities: Pursuant to claim 73, at line 1, after "wherein", delete from "said" to "consisting of" in entirety and insert - - the program instructions generates at least one design-specific cell selected from the group consisting of:- - in lieu thereof. Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2, 12, 22, 32, 40, 48, 55, and 62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Pursuant to claims 2 and 12, the clause "wherein generating comprises evaluating said design-specific cell based on a context of use" is inaccurate and confusing. Applicants' specification states that the characterization step is based on consideration of a design-specific context and the generation step/process considers cell usage (i.e. context). Applicants should consider revising this limitation in accordance with Applicants' specification to read e.g. "generating comprises evaluating said design-specific cell based on cell usage context."

***Claim Objections***

6. Claim 75 is objected to because of the following informalities: Pursuant to claim 75, its base claim, #30, references a design-specific cell that is *generated* using program instructions, therefore claim 75 needs to be reworded accordingly, e.g. ". . . wherein the program instructions generates at least one design-specific cell selected

Art Unit: 2825

*from the group consisting of: CMOS cells, static CMOS cells, and dynamic CMOS cells."* Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Rejection of claims 1-9, 11-19, 21-36, 38-44, 46-52, 54-59, and 61-77**

8. Claims 1-9, 11-19, 21-36, 38-44, 46-52, 54-59, and 61-77 are rejected under 35 U.S.C. 102(e) as being anticipated by Kumashiro et al., U.S. Patent 6,301,692.

9. Pursuant to claim 1, Kumashiro disclose an automated method for designing integrated circuits (Abstract; col. 1, ll. 14-27), comprising the steps of describing an integrated circuit (Fig. 1, #101; col. 12, ll. 22-23), the description including at least one design objective of said IC (col. 3, ll. 60-64, wherein the design objective is a reduction in consumed power and an increase in speed for the circuit; col. 4, ll. 3-15, wherein the design objective is to ensure superiority in speed, area and consumed power by a circuit structure); partitioning said description into at least one functional block (fig. 1, #102, circuit dividing processing; col. 12, ll. 24-33); said functional block comprising at least one predefined cell (col. 12, ll. 28-33, the partial circuit); and generating at least one design-specific cell representative of said at least one predefined cell of said

Art Unit: 2825

functional block (col. 12, ll. 34-40), wherein said design-specific cell is generated, characterized or optimized at the transistor level (col. 14, ll. 1-3; see also col. 13, ll. 48-54) based on said design objective of said IC design (col. 16, ll. 8-13).

10. Pursuant to claim 2, wherein said step of generating comprises evaluating said design-specific cell based on a context of use for said design-specific cell (col. 12, ll. 55-67 to col. 13, line 5 (verifying timing of a given logic circuit based on the register portion delay characteristic library, the partial circuit delay characteristic library, and the net list having the cell level)).

11. Pursuant to claim 3, wherein said step of generating comprises characterizing and selecting said design-specific cell from a minimal set comprising at least one cell, based on said IC design objective (Fig. 18, #2102; col. 19, ll. 15-25).

12. Pursuant to claim 4, wherein said step of characterizing and selecting is repeated until the design objective is met (col. 12, ll. 55-67 to col. 2, ll. 1-5; Fig. 1 illustrates an iteration condition at decision box #115).

13. Pursuant to claim 5, wherein said design objective is selected from the group consisting of: IC design die size, die area, performance, power consumption, routability, fault tolerance, signal integrity, testability, reliability and cost (Abstract, last line; col. 21, ll. 1-18).

14. Pursuant to claim 6, further comprising a step of optimizing said IC design (Fig. 1, #111-114; col. 15, ll. 16-25).

15. Pursuant to claim 7, wherein a design metric for the step of optimizing is at least one selected from the group consisting of clock speed, transistor sizing, signal integrity

Art Unit: 2825

and noise characteristics (col. 7, ll. 25-30 references power consumption and area considerations; col. 15, ll. 22-25 references delay.)

16. Pursuant to claim 8, wherein the optimizing is performed automatically (col. 1, ll. 14-17; Fig. 1 illustrates an automatic process which includes optimizing beginning at #115).

17. Pursuant to claim 9, wherein said optimizing is repeated until said IC design meets at least one design metric (Fig. 1, #114 illustrates the decision step of an iterative optimization).

18. Pursuant to claim 11, Kumashiro discloses a system (Fig. 18; col. 19, ll. 15-27) for implementing an automated integrated circuit design process (Abstract; col. 1, ll. 14-27), said system comprising a description of an integrated circuit (Fig. 1, #101; col. 12, ll. 22-23), the description including at least one design objective of the IC (col. 3, ll. 60-64); a local optimization control for partitioning the description into at least one functional block (fig. 1, #102, the circuit dividing processing provides a local optimization control function; col. 12, ll. 24-33), the functional block comprising at least one predefined cell (col. 12, ll. 28-33, the partial circuit); and a design-specific generator (the main cell layout generating processing performs this function, col. 17, ll. 23-29; see also col. 12, ll. 34-40) for generating at least one design specific cell representation of the at least one defined cell the functional block wherein said design-specific cell is generated, characterized or optimized at the transistor level (col. 14, ll. 1-3; see also col. 13, ll. 48-54) based on the design objective of the IC (col. 16, ll. 8-13).

Art Unit: 2825

19. Pursuant to claims 12-19, these claims incorporate the limitations already rejected in claims 2-9, respectively, supra, and are likewise rejected here based on the same reasoning.

20. Pursuant to claims 21-29, these claims recite the steps of the method already rejected in claims 1-9, respectively, and therefore claims 21-29 are rejected here based on the same reasoning.

21. Pursuant to claims 30, 62-69, these claims recites a storage medium with computer readable program instructions for automatically designing an IC using the claimed method of claims 1-9, respectively, supra. Kumashiro also discloses the limitation of a storage medium with computer readable instructions in claims 26, 27, and additionally at col. 25, ll. 9-13. Therefore, claims 30 and 62-69 are likewise rejected based on the reasoning provided in the rejections of claims 1-9, respectively.

22. Pursuant to claim 31, this claim incorporates limitations already rejected in claims 1 and 6, and is likewise rejected based on the same rejection reasoning.

23. Pursuant to claims 32-35, these claims incorporate limitations already rejected in claims 2-5, supra, and are likewise rejected based on the same reasoning.

24. Pursuant to claim 36, these claims incorporate limitations already rejected in claim 7, supra, and is likewise rejected here based on the same reasoning.

25. Pursuant to claim 38, wherein said design-specific cell is a transistor-level cell (Figs. 4A, 4B, col. 13, line 55 to col. 14, line 8).

26. Pursuant to claim 39, this claim incorporates the limitations of claims 1 and 9, rejected, supra, and therefore claim 39 is likewise rejected here based on the same reasoning.

27. Pursuant to claims 40-43, these claims incorporate the limitations of claims 2-5, rejected, supra, and are likewise rejected here based on the same reasoning.

28. Pursuant to claim 44, this claim incorporates the limitations of claim 7, rejected, supra, and is likewise rejected here based on the same reasoning.

29. Pursuant to claim 46, this claim incorporates the limitation of claim 38, rejected, supra, and is likewise rejected here based on the same reasoning.

30. Pursuant to claim 47, this claim incorporates the limitation of claims 1 and 9, rejected supra, and therefore claim 47 is likewise rejected here based on the same reasoning.

31. Pursuant to claims 48-52, these claims incorporate the limitations of claims 2-5 and 7, rejected supra, and therefore claims 48-52 are likewise respectively rejected based on the same reasoning.

32. Pursuant to claim 54, this claim incorporates the limitations of claims 1 and 9, rejected, supra, and therefore claim 39 is likewise rejected here based on the same reasoning.

33. Pursuant to claims 55-59, these claims incorporate the limitations of claims 2-5 and 7, rejected supra, and therefore claims 55-59 are likewise rejected here based on the same reasoning.

Art Unit: 2825

34. Pursuant to claim 61, this claim incorporates the limitation of claim 38, rejected, supra, and is likewise rejected here based on the same reasoning.

35. Pursuant to claims 70-77 wherein said design specific cell is at least on selected from the group consisting of CMOS cells, static CMOS cells, and dynamic CMOS cells (col. 15, ll. 26-36; col. 19, ll. 15-59).

### ***Conclusion***

36. Any inquiry concerning this communication or earlier communications should be directed to Examiner A.M. Thompson whose telephone number is (571) 272-1909. The Examiner can usually be reached Monday thru Friday from 8:00 a.m. to 4:30 p.m..

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
